EXPERIENCE:

- Software Engineer @ Blocship:** May 2023 – Till Date
Deputed to working as backend engineer and consultant for application solutions as well. Working with mobile app devs working on Flutter and with web devs as well for working on their core functionality using PHP such as Food Delivery app for riders, open-market bidding app for farmers and involved in other projects. Also, when there are requirements for code fixes and reviews, there are my contributions as well.
- Software Engineer @ Sybrid (Pvt.) Ltd:** April 2021 – May 2023
*Entitled as Software Engineer by working on many enterprise web products. **FITE** is a multi-lingual portal for hiring engineers from Pakistan region for Japanese companies. Sales Portal for **Edtutor** App, an ed-tech app used for the students studying in schools from primary school to high school level. Also was involved in other Lakson Group projects including Colgate Inventory management, Syvox, PMS etc. For Sybrid's business unit, developed a **tailored Project Administration and Management App**, used by sales, finance, production teams and administration.*
- Associate Developer (Backend) @ TAFSOL Technologies:** Aug 2020 – April 2021
*Worked on Web Apps & Website membership functionalities, e-commerce (**Sports Agency website**), timesheet management and much more.*
- Web Intern @ SZABIST (Computer Science Research department):** Jan 2020–May 2020
*Revamped and smarten-up **OJS (PHP-Framework)** as **Front-end Web Developer** using **Bootstrap, HTML, CSS, and JavaScript** on Linux-based environment (**Ubuntu**) in collaboration with Development & Deployment Teams*
